Srishanth Gunday

Backend Software Engineer | Java, Spring Boot, REST APIs, AWS

Hyderabad, Telangana, India | +91-8977704995 | gundaysrishanth@gmail.com | GitHub | LinkedIn

SUMMARY

Computer Science undergraduate (graduating 2027) and backend-focused software engineer with 12 months of professional experience building REST APIs, database-driven applications and cloud-deployed services. Strong in Java, Spring Boot, Spring Security, Hibernate/JPA and SQL, with hands-on Node.js, Docker, AWS, JUnit unit testing and React.

SKILLS

Languages: Java, SQL, Python, JavaScript, TypeScript, C

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, API Integration, Microservices, Node.js, Express.js

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB

Cloud & DevOps: AWS (Lambda, API Gateway, S3, Amplify, CloudFront), Microsoft Azure Fundamentals, Docker, Git, GitHub, CI/CD, Linux Fundamentals

Testing & Practices: JUnit, Unit Testing, API Testing, Postman,OOP, Data Structures & Algorithms

Frontend: React.js, TypeScript, HTML, CSS

Generative AI: Spring AI, RAG, LangChain, LangGraph, Qdrant

EXPERIENCE

Full Stack Developer, AbroadPlan Feb 2025 – Feb 2026

- Developed and maintained backend REST APIs using Node.js and Express.js, implementing business logic, authentication, third-party API integration and data processing for production features.
- Designed MySQL schemas and wrote optimized SQL queries to manage application data and improve API performance.
- Built React.js features and integrated them with backend REST APIs to deliver end-to-end functionality.
- Deployed and maintained cloud services on AWS (Lambda, API Gateway, S3, Amplify, CloudFront) through Git/GitHub-based workflows.
- Debugged and resolved issues across frontend, API, database and cloud layers, improving reliability of integrations and deployments.

PROJECTS

Cloud-Based Student Portal Java, Spring Boot, React.js, REST APIs, MySQL, AWS

- Built a cloud-based student portal with authentication, university data management, RESTful APIs and MySQL integration.
- Developed Spring Boot backend API workflows in Java and integrated React.js frontend components through JSON-based APIs.
- Deployed on AWS using Lambda, API Gateway, S3, Amplify and CloudFront.

Lucky Exotica – Full-Stack Booking Platform React, TypeScript, Supabase, PostgreSQL, Vercel

- Built and deployed a booking platform with live availability, booking workflows, admin management and guest reviews, backed by PostgreSQL.
- Delivered production releases with GitHub-based CI/CD through Vercel.

AI Software Development Agency – Agentic AI System Python, LangGraph, LangChain, Gemini

- Built a multi-agent system that turns natural-language requirements into architecture, backend, database and QA plans using conditional workflow routing.

Expert Legal Document Analyzer – RAG Application Python, LangChain, Qdrant, OpenAI Embeddings

- Built an end-to-end RAG pipeline: document parsing, chunking, embeddings, vector search and context-grounded LLM answers over uploaded legal documents.

EDUCATION

B.Tech in Computer Science and Engineering, Vignan Institute of Technology and Science, Hyderabad 2023 – 2027
